

JUSTIN LEE

Full Stack Developer

+65 6516 0411 @ justinleedev411@gmail.com linkedin.com/in/justinleedev411 Singapore

SUMMARY

Full-stack developer based in Singapore with over four years of experience building scalable web applications using the MERN stack and tools like TypeScript and Tailwind CSS. Experienced in delivering real-world projects, from developer communities to productivity tools, with a focus on clean user interfaces, solid backend structure, and performance. Strong foundation in computer science, Agile collaboration, and problem-solving through practical, efficient code. Passionate about creating meaningful digital experiences that scale with user and business needs.

EXPERIENCE

Full Stack Developer

TechNova Solutions

09/2023 - 12/2024 Singapore

- Developed full-stack web applications using React.js, Node.js, MongoDB
- Built responsive user interfaces with Tailwind CSS and Material UI
- Integrated RESTful APIs in collaboration with backend developers
- Improved frontend performance and maintained CI/CD reliability

DevNet - MERN Stack Developer Community Platform

DevNet

02/2020 - 07/2023 remote

- Led frontend and backend development for a community platform targeting developers
- Built user dashboards, authentication flows, and content management features using React and Express
- Deployed MongoDB-backed services with role-based access control
- Collaborated in a distributed Agile team to deliver feature rollouts biweekly

Frontend Developer

Simmi Foundation

2022 - 2023 Remote

- Designed and implemented admin and user interfaces using React.js
- Applied Bootstrap for responsive layout consistency across devices
- Introduced interactive UI components to improve user engagement metrics

Web Developer Intern

Twowaits

2021 Remote

- Developed a fully functional gym website using HTML, CSS, and Bootstrap 5
- Focused on best practices in layout, structure, and mobile responsiveness
- Capstone Project: "Predictive Task Manager" — Built as part of NUS academic work
